

Universal Waste

Universal Wastes Are:

- Batteries
- Fluorescent & High Intensity Lamps
- Mercury Thermometers
- Mercury Switches
- Mercury Thermostats & Probes
- Counterweights & Dampers
- Pressure or vacuum gauges
- Aerosol Cans

Why shouldn't I throw Universal Wastes in the garbage?

Universal Wastes contain toxic elements, such as mercury and cadmium, or exhibit other hazardous characteristics that pose a potential threat to human health and the environment. Mercury containing wastes deposited into waterways, accumulate in the tissue of fish and wildlife and can be passed to humans who eat the fish and wildlife. Accumulation of mercury in the human body can cause damage to the nervous system.

Universal Waste Drop Off Location

Kings Waste & Recycling Authority

7803 E. Hanford-Armona Road

Hanford, CA 93230

Office: 559-583-8829
